## Education

---

<b>Ph.D. in Computer Science and Engineering</b> <i>University of Notre Dame</i> Advisor: Toby Jia-Jun Li	2021–Present Notre Dame, IN
<b>Ph.D. in Computer Science (Transfer out)</b> <i>University of Rochester</i> Advisor: Zhen Bai	2019–2021 Rochester, NY
<b>M.S. in Computer Science and Engineering</b> <i>University of Minnesota, Twin Cities</i> Advisor: Haiyi Zhu	2017–2019 Minneapolis, MN
<b>B.Eng. in Software Engineering</b> <i>Shaanxi Normal University</i>	2013–2017 Xi'an, China

## Industrial Experience

---

<b>Apple Inc.</b> <i>AI/ML research intern</i> Mentor: Alistair Conkie, Ladan Golipour Project: Zero-shot learning for foreign accent conversion <ul style="list-style-type: none"><li>– Work with Siri text-to-speech team to build zero-shot learning pipeline converting speaker's foreign English accent to native accent without further fine-tuning upon specific foreign speakers</li><li>– Develop and train accent and speaker encoder with Speech Accent Archive and Voxceleb1 dataset respectively</li><li>– Build and train foreign accent conversion models based on Tacotron and FastSpeech that converts the concatenation of linguistic feature vector, accent and speaker embedding into mel-spectrogram</li></ul>	Seattle, WA May 2022–Aug 2022
--	----------------------------------

## Research Projects

---

<b>PaTAT: Human-AI collaborative qualitative coding with explainable interactive rule synthesis</b> <i>Leading student researcher</i> <ul style="list-style-type: none"><li>– Developed pattern synthesizer based on users' open coding</li><li>– Developed interactive qualitative coding system that is able to learn coding pattern and recommend coding for unannotated data</li><li>– Conducted lab study to evaluate the usability and effectiveness of PaTAT system</li><li>– Wrote a paper submitted to CHI'23</li></ul>	Nov 2021–Sep 2022
<b>Label Sleuth: Human-AI collaborative textual data annotation platform</b> <i>Leading student researcher/developer</i> <ul style="list-style-type: none"><li>– Led the development of Label Sleuth: a platform enabling data owner and model developer to dispatch textual data annotation tasks to non-expert annotators while training and evaluating classification model via active learning</li><li>– Closely worked with design and product team at IBM Research to deliver the <a href="#">Label Sleuth platform</a></li></ul>	Apr 2022–Aug 2022
<b>Error taxonomy, detection, and repair of NL2SQL model</b> <i>Leading student researcher</i> <ul style="list-style-type: none"><li>– Developed an SQL error labeling system and coding the error types of the state-of-the-art NL2SQL models</li><li>– Developed user interface that supports a range of NL2SQL error detection and repair methods</li><li>– Wrote a paper to be submitted to CHI 2023 as the co-first author</li></ul>	Jun 2021–Sep 2022
<b>PEANUT: Human-in-the-loop system for audio-visual data annotation</b> <i>Leading student researcher</i> <ul style="list-style-type: none"><li>– Developed a human-AI collaborative audio-visual annotation system in which AI can automatically complete the annotation of sounding objects in video frames based on user's guidance</li><li>– Conducted conditional user study to test the usability, efficiency and effectiveness of the annotation system</li><li>– Wrote a paper to be submitted to CHI 2023 as the first author</li></ul>	Jul 2021–Apr 2022

## StoryBuddy: interactive storytelling system with automatic question generation

Leading student researcher

Jun 2021–Sep 2021

- Developed a storytelling system that supports automatic story question generation and flexible parent involvement
- Conducted user study to test the usability and effectiveness of the storytelling system
- Published a full paper as first author at CHI 2022

## HAICOR: Human-in-the-loop tool for enhancing the rationality of AI commonsense reasoning

Leading student researcher

Sep 2019–May 2021

- Designed and developed a platform facilitating lay users' debugging rationality of AI commonsense reasoning with intelligent argumentative scaffolding
- Developed GPT-2 based knowledge-aware commonsense reasoning model for naïve psychological need prediction on ROCStories dataset

## Skills

---

**Research expertise:** Human-AI collaboration, Natural language processing, Speech processing

**Machine learning:** Pytorch, Tensorflow, SciPy, SpaCy

**Web development:** React, Vue.js, Flask, MongoDB, SQL

**Programming language:** Python, Java, C, C++, Javascript

**HCI:** Qualitative and quantitative research methods (e.g. survey, interview, statistical testing, field study, etc)
